# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

Windy, Unsettled, Wet Weather Returning Late Today Into Early Tuesday

A strong Pacific frontal system will approach the north coast today. Afternoon southerly winds will gust to 20-30 mph in open areas and gusts in the most wind-prone areas like Weed may reach 40 mph. Winds will be stronger tonight and Monday. SW to SE gusts over the higher terrain of Northern California will be 40-50 mph, and locally higher. Light to moderate rain will reach the north coast this evening and spread inland overnight through early Tuesday. Most areas will see wetting rain from this system, with the exception of far eastern and southern areas where little to no rain may fall. Snow levels will be 6000 feet or higher. The front and rain will pull back to the coastal areas late Tuesday through Thursday, while other areas remain partly cloudy and breezy. Late on Thursday a Pacific low pressure system will approach central CA. Scattered showers will spread into Northern California Thursday night and Friday. Another strong front will reach the north coast with rain and gusty south winds late next weekend.

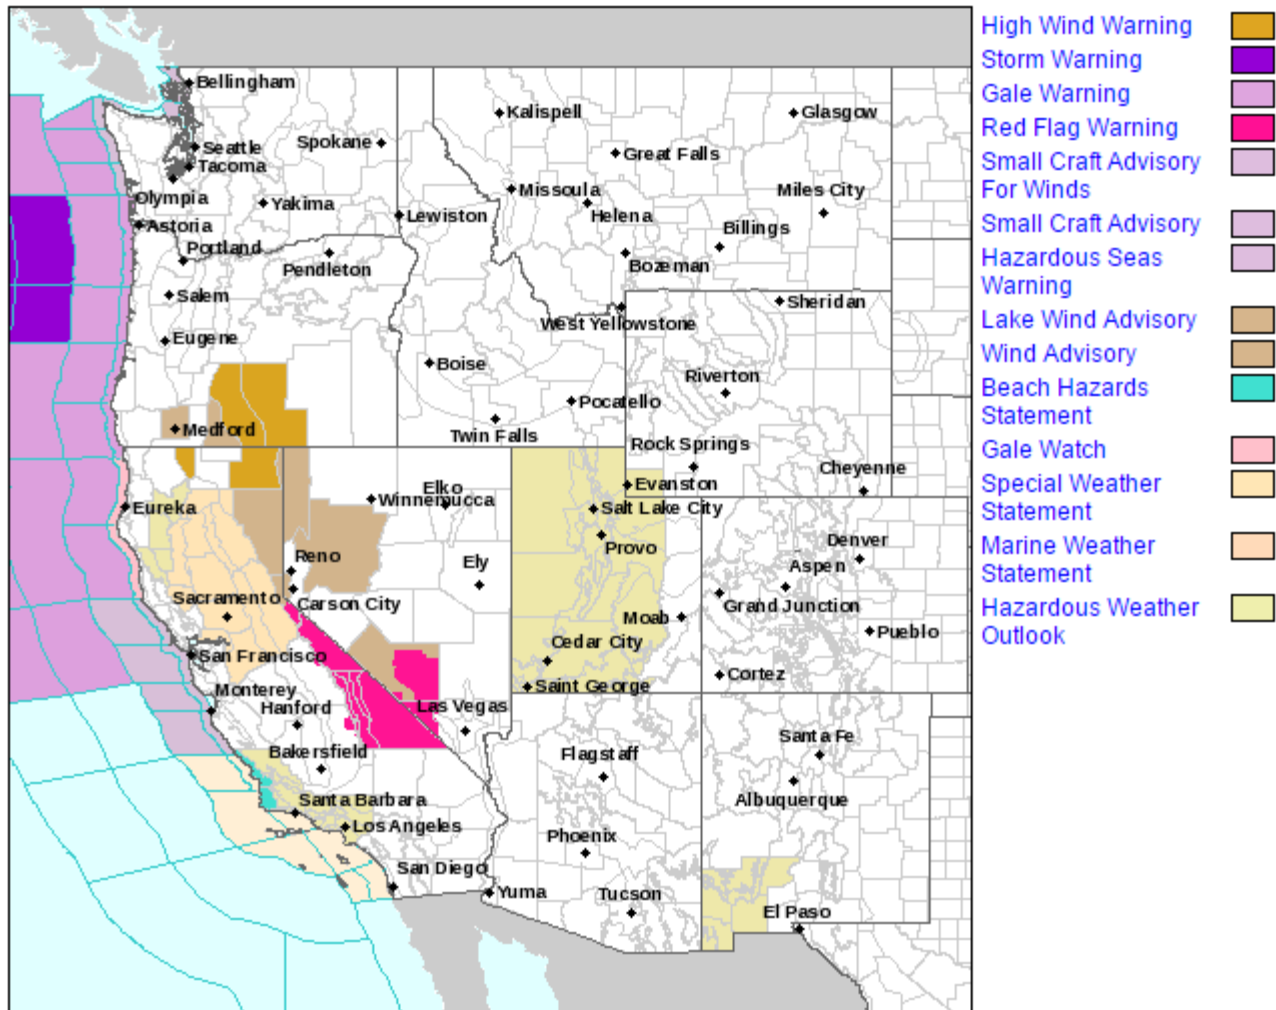

## **SOUTHERN CALIFORNIA**

Subtropical moisture ahead of a Pacific trough will bring scattered showers to much of Southern California this afternoon through Monday evening and to the Sierra on Monday. Showers will end across the region Monday night after the trough moves off to the east. Most locations will receive less than a quarter inch of rainfall through Monday. Southerly winds of 15 to 25 mph with gusts to 40 mph will continue to surface across the mountain ridges and desert passes through Monday evening. Temperatures will cool through Monday, with near normal temperatures Monday. Maximum temperatures will be in the 60s to low 70s across the mountains and mid 70s to mid 80s in the valleys today. Temperatures will warm a few degrees and humidity will decrease a little both Tuesday and Wednesday as a weak ridge of high pressure builds northward from Mexico. Winds will be light Tuesday and Wednesday. A couple of Pacific troughs will bring periods of showers to the entire region Thursday afternoon through next weekend. These troughs will also bring gusty southerly winds to the mountains and deserts. Temperatures will cool Thursday and then temperatures will be near normal Friday through next weekend.
